Report 4-AMTS-2012-03-14.docx;

Jackie,

How are you?

We just finished our report on evaluation of the AMTS. It is the fourth report in our PCB publication series.

This draft report is currently under EPA internal peer review and will eventually be available to the public.

Could you please take a look at it? Please pay attention to Table 2.1 in page 4, in which we presented the formulation of the AMTS. We want to make sure NASA is OK with the information we presented. If not,

we will delete the last two columns from the table. This draft is for internal use only, please do not distribute

it to any third-party organizations.

Thank you in advance and best regards,

Xiaoyu
